## Personal Profile

---

Gained a broad grounding in programming while studying a Udemy full-stack software development course in my spare time. Discovered my passion for coding and completed multiple projects.

An enthusiastic self-starter pursuing a career change from teaching, my recent software engineering skills bootcamp has given me a thorough grounding in full-stack development.

While exploring JavaScript, Node.js, and Python, discovered that my interests lie in backend development. Would like to expand into a junior role for a successful and innovative company.

## Education and IT Training

---
